Offspring Biosciences Management Team

Södertälje, January 21, 2021 -- Offspring Biosciences AB, a leading global provider of advanced molecular pathology services, announced that its Board of Directors has elected David Fairley and Alan Williams as Non-Executive Directors effective today.

David Fairley Non-Executive Director

David Fairley, currently Chief Executive Officer of Histopath Consulting Ltd, and previously Managing Director and owner of Histologix Ltd, which he took from startup through to sale, has been involved in a range of global research and regulatory projects including, but not limited to, immuno-oncology, in situ hybridization, antibody multiplexing, immunohistochemistry assay validation, image analysis and biosimilars, and as a result is able to advise on a range of technical issues. He has a wealth of knowledge and experience gained from within the contract research regulatory environment over many years and has been technically and commercially responsible for developing and running specialised histology studies for the pharmaceutical and biotechnology industry.

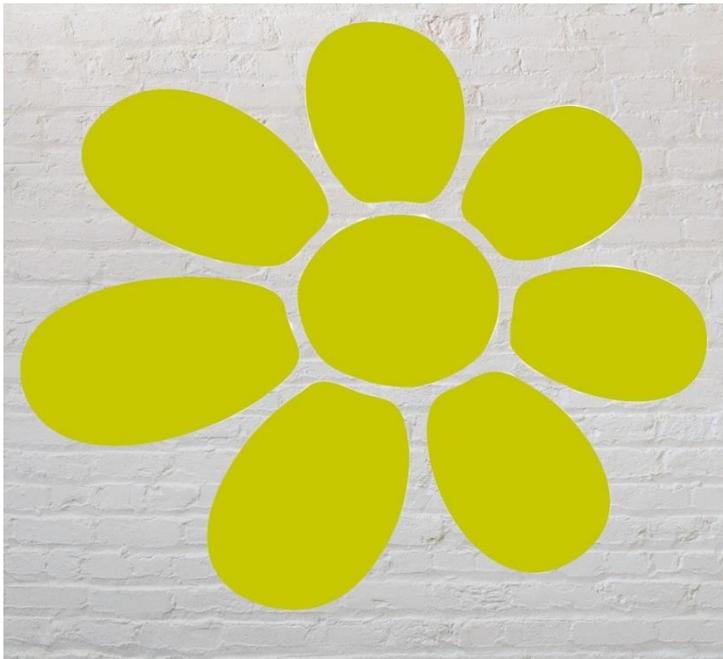

Commenting on his acceptance, David said, "I am pleased to announce I have accepted this invitation to join the board of OffSpring Biosciences as a Non-Executive Director with a role to provide strategic advice on testing services, the introduction of international quality standards, in addition to identifying new commercial avenues and opportunities for growth".

Alan Williams is Chief Executive Officer of Talk Biotech Ltd, where he provides a range of life sciences research products and services, and commercial consulting services including support for technology and biotechnology startups, small to medium enterprises and university spinouts. He has over 20 years of experience in the life sciences industry, including working within an FDA audited GLP-compliant lab, several commercial roles for a blue-chip global technology company, and senior commercial roles at contract research organizations.

Alan Williams Non-Executive Director

Of his acceptance, Alan commented, "Offspring Biosciences is an innovative provider of advanced contract research services, delivering highly reliable and informative data for critical project decisions. I am honoured and delighted for this opportunity to join the company's Board and help contribute towards the success of Offspring Biosciences".

About Offspring Biosciences AB

Offspring Biosciences, which emerged from AstraZeneca's Södertälje site for Research and Development, is an advanced CRO partner to customers within the biotechnology and pharmaceutical industry, delivering data to support decision making for successful and cost-effective development of novel treatments to advance human health.
